

A collaboration and business platform created for the energy sector

www.innovarpel.org

With Innov@arpel, your company will have a new communication and networking channel to disseminate its latest developments and innovations, whether related to technology or management issues.

Innov@arpel is a virtual platform developed by ARPEL with the aim of promoting the interaction between technology solutions providers (R&D centers, universities, goods & services providers) and the operating companies in the energy sector.

Innov@arpel brings together supply and demand for innovation and technology from anywhere in the world.

Through a corporate account, users have access to all the platform functionalities.

There are 3 types of accounts, depending on the number of users requested, thus meeting the needs of each organization.

FUNCTIONALITIES:

BENEFITS FOR:

Operators

- Massive and facilitated access to information on innovative technologies that already exist or are under development
- Start of contacts and building of alliances with other members
- Use of new technologies to improve competitiveness
- Networking and technical development of young professionals.

Technology Providers

- Regional and international projection of the business
- Interaction with operating companies, which represent over 90% of the upstream and downstream activities in Latin America and the Caribbean
- Knowledge of the needs of the industry

R&D Centers and Universities

- Approach to the production sector
- Help to monetize R&D projects
- Publication of patents, papers, and other technical works
